

Application No. 10/690,195  
Amendment Dated 3/16/06  
Reply to Office Action of 9/16/05

This listing of claims will replace all prior versions, and listings, of claims in the application:

**In the Claims:**

1. (CURRENTLY AMENDED) A garment configurable as a single panel or interconnected multiple panel garment comprising:

[[a]] at least one panel of fabric comprising a first half and a second half joined along a common foldline;

a first opening formed proximate the foldline; and

~~at least one cooperating fastener~~ fasteners positioned on ~~at least one of~~ the first half and the second half of the panel, wherein the cooperating fasteners are operable to secure for securing the first half of the panel to the second half of the panel as a single panel garment and to secure adjacent panels together as an interconnected multiple panel garment.

2. (CURRENTLY AMENDED) The garment of claim 1, wherein the ~~fastener~~ comprises fasteners comprise a male component and a female component, the male component positioned on one of the first half and the second half of the panel and the female component positioned on the other of the first half and the second half of the panel.

Application No. 10/690,195  
Amendment Dated 3/16/06  
Reply to Office Action of 9/16/05

3. (ORIGINAL) The garment of claim 2 wherein the panel comprises a material selected from the group consisting of cotton, polyester, rayon, linen, nylon, wool, silk, rubber, and combinations thereof.

4. CANCELED.

5. (ORIGINAL) The garment of claim 2 wherein each of the first half and the second half includes opposing longitudinal edges comprising one of the male and female components of the at least one fastener.

6. CANCELED.

7. CANCELED.

8. (ORIGINAL) The garment of claim 1 further comprising a pair of second openings in at least one of the first half and the second half of the panel.

9. (ORIGINAL) The garment of claim 1 further comprising a hood attached to the panel proximate the first opening.

Application No. 10/690,195  
Amendment Dated 3/16/06  
Reply to Office Action of 9/16/05

10. (ORIGINAL) The garment of claim 1 wherein the first opening comprises a lining.

11. (ORIGINAL) The garment of claim 1 further comprising at least one image on at least one of the first and the second half of the panel.

Application No. 10/690,195  
Amendment Dated 3/16/06  
Reply to Office Action of 9/16/05

12. (CURRENTLY AMENDED) A garment configurable as a single panel or interconnected multiple panel garment comprising:

[[a]] at least one panel of fabric having a first half, a second half, and a central opening therebetween, the first half and second half comprising opposing longitudinal edges, and having a common foldline proximate the central opening; and a plurality of fasteners, each fastener ~~comprising a male component and a female component, the male components~~ being positioned proximate the longitudinal edges of one of the first half and the second half of the panel ~~and the female components positioned proximate the longitudinal edges of the other of the first half and the second half of the panel~~, wherein the ~~male components are adapted to attach to the female components for securing the first half of the panel to the second half of the panel~~ fasteners are configured to secure the first half of the panel to the second half of the panel as a single panel garment and to secure adjacent panels together as an interconnected multiple panel garment.

13. (ORIGINAL) The garment of claim 12 wherein the panel comprises a material selected from the group consisting of cotton, polyester, rayon, linen, nylon, wool, silk, rubber, and combinations thereof.

14. CANCELED.

Application No. 10/690,195  
Amendment Dated 3/16/06  
Reply to Office Action of 9/16/05

15. (ORIGINAL) The garment of claim 12 further comprising at least one image on at least one of the first and the second half of the panel.

16. (ORIGINAL) The garment of claim 12 wherein each of the first half and second half of the panel further comprise a transverse edge opposing the foldline, wherein the longitudinal edge of the first and second halves is about 45 inches long and the opposing transverse edges are about 60 inches wide.

17. (ORIGINAL) The garment of claim 16 wherein the plurality of fasteners comprise strips of about 36 inches, the strips having thereon one of the male and the female fastener components spaced about two inches apart.

18. (ORIGINAL) The garment of claim 17 wherein the fasteners are snaps.

19. (WITHDRAWN) A method of manufacturing a garment for wear by a person, the method comprising:

providing a panel of fabric having a first half, a second half, and a central opening therebetween, the first half and second half comprising opposing longitudinal edges, and having a common foldline proximate the central opening;

providing at least one fastener comprising a male component and a female component, wherein the male component is adapted to attach to the female component; and

positioning the male component on one of the first half and the second half of the panel and the female component on the other of the first half and the second half of the panel for attaching the first half of the panel to the second half of the panel.

20. (WITHDRAWN) The method of claim 15 further comprising providing instructions for wearing the garment.

21. (WITHDRAWN) A method of providing warmth to a person, the method comprising:

providing a garment for placement on the person's shoulders, the garment comprising a fabric panel having a first half, a second half, and a central opening therebetween, and a plurality of fasteners, each fastener comprising a male component and a female component, the male components positioned proximate the longitudinal edges of one of the first half and the second half of the panel and the female components positioned proximate the longitudinal edges of the other of the first half and the second half of the panel, wherein the male components are adapted to attach to the female components for securing the first half of the panel to the second half of the panel; and

instructing the person to place the garment on the person's shoulders and to fasten the male components to the female components for securing the garment around the person thereby providing warmth to the person.
